Monash University

Areas of Expertise

- Pasture agronomy
- Pasture and crop field trials
- Species and variety selection
- R&D project management
- Forage Plant Breeding
- Technical literature writing

James is a Pasture Agronomy Consultant with Meridian Agriculture. James holds a Bachelor of Agricultural Science degree and a Master of Science (Plant Breeding) degree. James spent 11 years working with private enterprise in Research and Development in the pasture seed industry. His primary responsibilities included managing the integration process of the research functions across Australia, project management, design and implementation of field trials, delivery of innovative technologies and has several publications in scientific literature.

James has been involved in both the training and extension of technical agronomy updates to industry and producers. James has also been involved in many plant breeding projects specifically designed for Australian grazing systems. James is also currently a board member of the Pasture Trial Network.

James is based out of our Yendon office in Victoria.
